

INTEGRATED ZAP>IT® SOLUTIONS

Zatkoff's Integrated ZAP>IT® Solutions offer a collaborative approach utilizing the customer's existing Enterprise Resource Planning (ERP) system data to enable a seamless flow of information between companies. This automated data exchange was developed to handle several actionable file inputs, streamlining the customer's procurement processes. Using analytical intelligence, ZAP>IT® creates automated reports that help prevent errors and inefficiencies typical of traditional supply chain programs.

FEATURES & BENEFITS

- Reduce acquisition cost
- Streamline procurement processes
- Compatible with ERP system data
- Utilizes customer's web portal or vendor interface
- Seamless interaction between companies
- Allows for actionable, granular data insights
- Customizable system, even after implementation

Predictive Inventory Analytics
Order/Acknowledgement
Advanced Shipping Notice (ASN)
Receiving Signal
Summary Invoice
Remittance Advice
Evaluated Receipt Settlement (ERS)
Key Performance Indicators

MITIGATE RISKS THROUGH COLLABORATIVE DATA INTELLIGENCE

REDUCE ACQUISITION COST • PREVENT STOCK-OUTS • ELIMINATE OVERBUYING

VALUE PROPOSITION

PREDICTIVE INVENTORY ANALYTICS

Utilizes customer's forecast and purchasing patterns to predict inventory needs, even during usage spikes, maintaining unmatched on-time delivery.

SUMMARY INVOICE

Zatkoff provides various billing cycle summaries, with details of subordinate items, increasing cash flow.

ORDER/ACKNOWLEDGEMENT

New orders, order modifications, and acknowledgements are automatically processed, eliminating costly inaccuracies.

REMITTANCE ADVICE

A remittance advice, in conjunction with a receiving signal, allows for payments to be automatically applied, minimizing errors and payment discrepancies.

ADVANCED SHIPPING NOTICE (ASN)

As items are shipped, the system provides a unique tracking number, which matches identifiers on the packing slips or shipping labels, allowing for quick and efficient receiving.

EVALUATED RECEIPT SETTLEMENT (ERS)

This feature eliminates manual invoice matching, providing a faster and more precise payment process.

RECEIVING SIGNAL

Once shipments are received, potential discrepancies are immediately and automatically identified, preventing errors in quantity, price, or number of packages received.

KEY PERFORMANCE INDICATORS

Detailed reports offer performance metric insights, improving processes and inventory management.

Each feature can be implemented selectively or in combination according to the customer's requirements. The ZAP>IT® system is designed to be flexible, accommodating a multitude of data formats, allowing customers to reduce their acquisition cost by streamlining the procurement process.

ADDITIONAL BENEFITS

- Barcoded packing slips
- Custom barcoded labels
- Custom kitting and tailored box/bag quantities
- Rapid traceability on every order
- Dedicated 60-day stock inventory
- Customizable system, even after implementation
